veneer COLLECTION

The cost-effective alternative to wood doors is Veneer. Veneer doors give the look and feel of a solid wood door without the added cost. In addition to being eco-friendly, the thin layer of Veneer increases the overall durability and strength of the door which prevents the doors from warping and minimizes damages. The three basic types of Veneer doors are:

■ Architectural / Commercial Light ■ Commercial Residential ■

- Available in various species, contact for specifications.
- 1 3/8" and 1 3/4" thickness, solid core, and hollow core.
- Available up to 4' x 10' with bonded/sanded core.

TRIM

It's all in the details. Whether it is adding to interior finishing or picking out hardware for the home we've got you covered. Abodian has partnered with leading distributors such as Metrie and Weiser to provide our clients with mouldings, casings, locks and handles for any style.

- Moulding comes in various sizes and styles
- Usually 16ft in length
- All moulding will be primed MDF

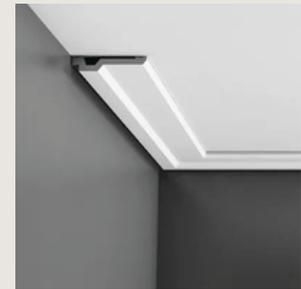

BASEBOARDS

Placed along the wall at the floor level. Baseboards go hand in hand with casings to complete the overall look of the room.

CASINGS

Cover the gap between drywall and the door or window. Usually being the most vibrant part of the room, simplicity is key.

CROWNS

Placed along ceiling and wall. Crowns offer a unique transition between the ceiling and wall.

PANEL MOULDING

Commonly used on walls, panel moulding creates an aesthetically pleasing outline to give your home a more elegant look.

WINDOW SILL

A horizontal shelf beneath the window. Having multiple functionality purposes, it also adds a layer of decorative class

ACCESSORIES

Customize your doors using our wide range of décor products to suite your homes personality. Whether your style is elegant and classic, chic and modern or anything in between, we can help bring your vision to life. Partnering with top brands such as Weiser, Taymor, Emtek, ASSA ABLOY and many more, providing clients endless options for customization.
